"SCIENTIA"

International Review of Scientific Synthesis

"SCIENTIA" is the only review in its field which has a world-wide circulation, treats up-to-date problems fundamental to all the sciences, receives contributions from outstanding international figures in the scientific world, and publishes articles in the language of their writers (English, French, Italian, German, Spanish). Each issue includes a Supplement containing complete French translations of all articles appearing in languages other than French.

Full details and a free back issue may be obtained by writing to "Scientia," Asso (Como), Italy, enclosing U.S.$0.25 or equivalent, preferably in air-mail postage stamps, to cover packaging and postage costs. For a current issue, please send U.S.$1.20 or equivalent, which will then be deducted from the price of a subsequent subscription. Annual Subscription: U.S.$14.00 in any country.

THE IDA AND HENRY SCHUMAN PRIZE IN THE HISTORY OF SCIENCE

1960

An annual award of $250.00 has been established by Henry and Ida Schuman of New York City for an original prize essay in the history of science and its cultural influences. This competition is open to graduate and undergraduate students in any American or Canadian college, university or institute of technology. Papers submitted for the prize competition should be approximately 5,000 words in length, exclusive of footnotes, and thoroughly documented. It is hoped that the prize-winning essay will be suitable for publication in *Isis*.

It is the wish of the donors that "history of science and its cultural influences" should be broadly interpreted. The papers may deal with the ideas and accomplishments of scientists in the past; they may trace the evolution of particular scientific concepts; or study the historical influences of one branch of science upon another. The phrase "cultural influences" is taken to include studies of the social and historical conditions that have influenced the growth of science, or the effects of scientific developments upon society in the realms of philosophy, religion, social thought, art and literature, economic progress, etc. Essays dealing with medical subjects are not acceptable, although papers dealing with the relations between medicine and the natural sciences will be welcomed.

Papers submitted for competition should be sent to the Chairman of the Prize Committee, Professor Erwin Hiebert, Department of History of Science, University of Wisconsin, Madison, Wisconsin. Inquiries about the competition may also be addressed to Professor Hiebert. To be eligible for consideration, papers must be received on or before the first of July, 1960. The announcement of the prize-winning essay will be made in the annual meeting of the History of Science Society in December.
